

# TIFOO

## COPPER AND BRASS CLEANER

# MANUAL

## COPPER CLEANER

### Security

For your own safety, please wear gloves and safety glasses. Don't touch the cleaned and degreased object with your fingers, so please wear gloves and use tweezers. Fingerprints prevent an even reaction of the solution and you won't have good results.

### Application fields

Tarnished copper, bronze and brass (blue, green and black patina), furthermore good cleaning effect for cleaning other metals like iron, steel, etc. Doesn't work on silver, so please use our silver cleaner for that.

#### **Insuitable:**

silver, aluminium, chrome-plated and nickel-plated surfaces

## Using the copper cleaner

Pour the cleaner in a glass and dip in the objects you want to clean. After a few minutes, they will be clean and can be polished with steel wool, for example. For big surfaces: Please apply the cleaner on steel wool or a piece of cloth and pass it several times over the patinated surface. The darkened parts will dissolve and after a small time, the bare metal can be seen.

In the following application example, you can see a comparison between a copper object before cleaning and the same object after cleaning.
