# MANUAL

## SILVER CLEANER

### Security

Please realize the cleaning in a well ventilated room because there can be unpleasant smells. Please wear gloves while working with the cleaner and avoid contact with food. Attention! Keep also in mind: knives normally have only a silver-plated hilt, but the blade normally is made of steel or stainless steel. In this case, the blade will be attacked by the cleaner and can be damaged. So don't dip these kinds of blade in the Tifoo Silver cleaner! We decline als liability for damage caused by incorrect or improper usage.

### Application fields

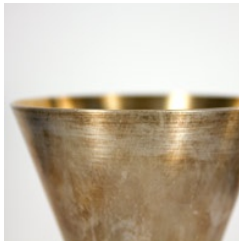

Bring back the gleam of silver objects like e.g. silver cuttlings or coins / medallions tarnished by silver sulfide layers.

## Using the silver cleaner

Put the degreased and tarnished silver cuttlings, coins or other silver objects you want to clean in a flat bowl. Pour the Tifoo Silver cleaner on the pieces so that they are completely covered. Attention: When treating knives, don't dip in the blades! According to the degree of tarnishing of the silver, let the objects in the solution at a warm, well ventilated place for about 1 to 5 minutes. In case of particularly resistant impurities, the process could need 10 to 12 minutes. Please only use these time spans in extraordinary cases.

Take the pieces out of the cleaning bath, rinse them thoroughly with water and dry them with a soft cloth.

Done! If necessary, you can always repeat the cleaning process.
